Tech To The Rescue

solves the tech resource scarcity problem

Number of Nonprofits in the movement

1927+

Number of projects matched

617+

Estimated monetary value of facilitated services in 2023

\$4,270,253

The Lily Project is an impact-driven organization that offers access to essential sexual health education and services empowering women and girls in Latin America to “own their body, health, and future” and is on a mission to ending premature deaths due to Cervical cancer – fully preventable disease.

Susan Cotton & Anielka Medina
Co-founders of The Lily Project

“When the pandemic forced us to pause our mobile help clinics, we started to test our ability to reach and serve women digitally using WhatsApp. We’ve had an amazing response and realised we are tapping into huge unmet need for a global app designed specifically for young Latinas. But we needed a ton of help to make this a reality.

We contacted Tech To The Rescue and that just made all the difference.”

Susan Cotton
Co-founder of The Lily Project

“TTTR matched us with LeanConvert surprisingly fast. We got to know the team not only as enthusiastic, friendly, and sympathetic guys, but also transparent, proactive, and helpful.”

Kriszta Pokol

Communications Coordinator
Hungarian Helsinki Committee

An interactive map highlighting human rights violations at the Hungarian-Serbian border, specifically focusing on the issue of pushbacks. The map aims to expose the alarming reality of approximately 150,000 pushbacks by Hungarian police in 2022, violating EU law and human rights obligations..

The Hungarian Helsinki Committee helps those whose human rights the state violated. Their clients are refugees, detainees and people who became victims of discrimination.

Hack To The Rescue is the largest AI-backed hackathon for good aimed at finding the best solution for nonprofits to solve the most pressing, real-world challenges and impact millions of people

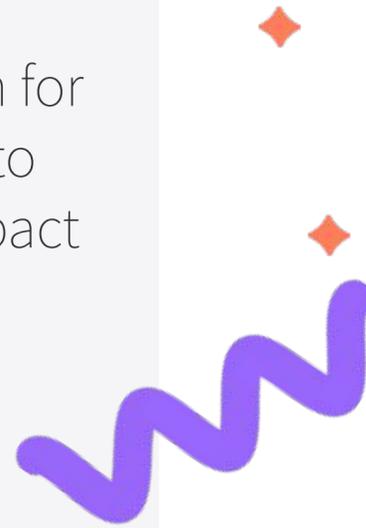

Air Quality Hackathon

December 6-8, 2023

Free, Virtual Event

in collaboration with 

“With AWS integration, human oversight, and responsible AI features, they’ve **set a new standard in scalable and secure data processing**. The technical solution made a **tangible impact in air quality monitoring**”

Bedrock App Mining the Air for Data Nuggets

Camaraderie team from AWS collaborated with **AFRI-SET**, from West Africa and created an innovative solution, utilizing Language Models (LLM) to **automatically generate Python codes for multiple Air Quality Sensors**, significantly streamlines data engineering efforts.

Key initiatives for 2024-2026

AI For Changemakers

We want Changemakers to have the ability to create custom AI-based solutions to massively scale up their impact.

We aim at 500 custom AI applications worth \$15M in software development services being created within 3 years, resulting in doubling the impact of 250 selected Non-profit Scaleups.

Crisis Response Unit

Crisis Response Unit ready to deploy in the area of crisis to facilitate and manage tech support efficiently.

We want to support 100 Nonprofits working in the rescue or recovery phase of global emergencies and impact the lives of 500.000 refugees and crisis victims.

Gamified Impact Investment Pledge

A snowball effect of companies pledging to invest

Our goal is 1000 companies taking the pledge by the end of 2025, followed by global recognition of top contributors and 10x more tech companies taking the impact investment pledge as a result.

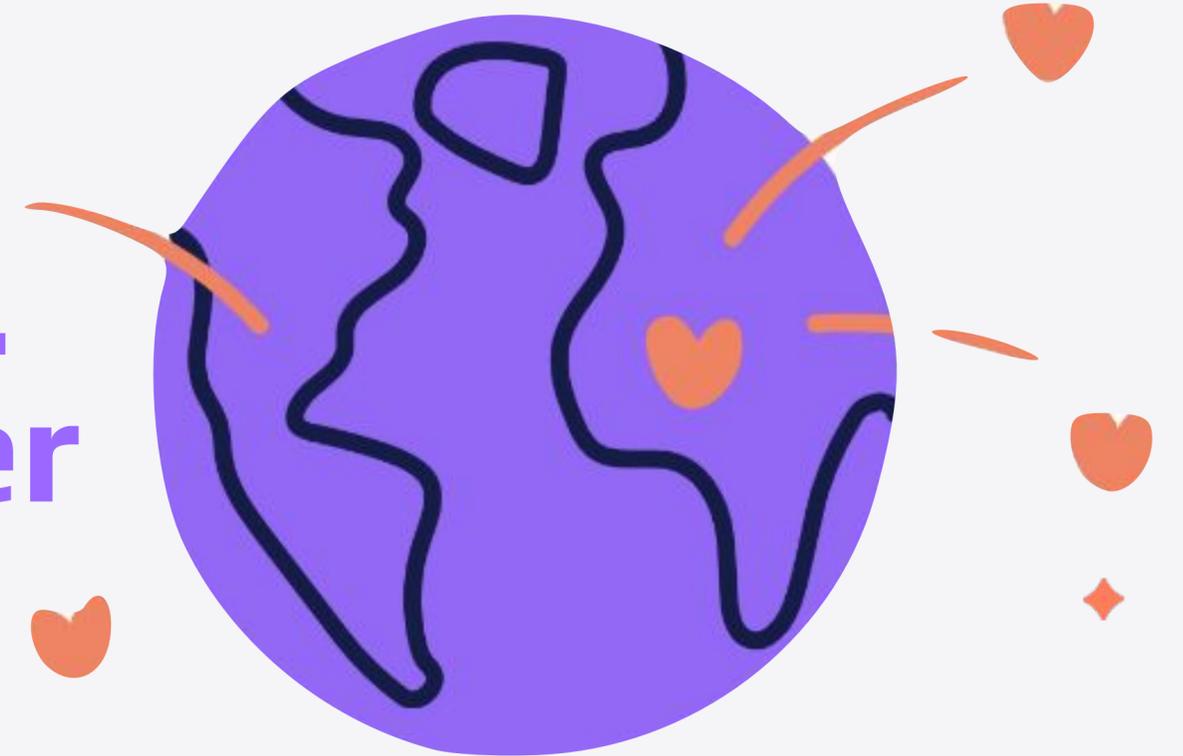

Support Us.

Co-create change with us. Become a Program Partner

Co-Design and support special programs working towards Systemic Change and Unlocking \$1B worth of tech services for Changemakers by 2030.

Utilize our network to help the nonprofits that you are already working with gain leverage.
