

AI for Changemakers

by  TECH TO THE RESCUE

# AI for Changemakers Accelerator Program

Join us and help outstanding nonprofits  
worldwide unlock their potential with AI!

With support from:

April 2024

## Empowering changemakers to scale

A global accelerator for AI innovators ready to tackle the world's most pressing challenges.

### Changemakers are vital

Changemakers play an ever-increasing role in society as challenges grow and become more pressing. They have the know-how to solve these challenges but lack the technical resources and funds to invest in scaling up their impact.

### AI is a gamechanger

The power of AI is a gamechanger and has the potential to solve these bottlenecks. Still, there is a huge demand for AI expertise, making it costly and difficult for changemakers to benefit from this new technology.\*

### We can bridge the gap

AI for Changemakers will break these barriers by bridging the gap between tech companies and nonprofits. With your help, nonprofits will receive the support needed to build real, impactful AI solutions to continue changing lives.

*\*93% of changemakers report the lack of IT or technical staff as being the barrier for their organisations. [Nonprofit Trends Report](#)*

# Join the world's largest AI accelerator that puts social impact first.

**200 challenges**

**111 nonprofits**

**50 mentors**

**5 impact areas**

## **Global Impact**

Tech companies work directly with outstanding nonprofits on real projects, acquiring new skills and harnessing the power of AI for good.

## **Thematic Focus**

Nonprofits are scouted in 5 cohorts: AI for Disaster Management, AI for Climate, AI for Health, AI for Education, and AI for Economic Growth.

## **AI Bootcamps**

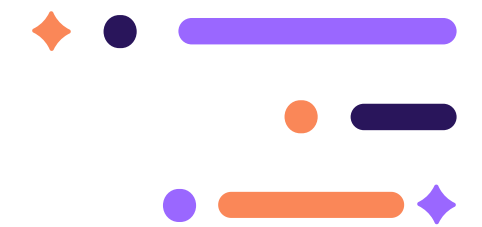

Nonprofits will undergo a 6-week AI strategy bootcamp led by top specialists in AI to recognize the potential and prepare projects for scaling with AI.

## **Implementation**

Most promising projects advance to the implementation phase. We help match your team with nonprofits to implement solutions and create a better future with AI.

**This is where you come in!**

# Accelerator stages

Participation in the program is free of charge.

Register your tech company for the program, so we can match you with a nonprofit organization.

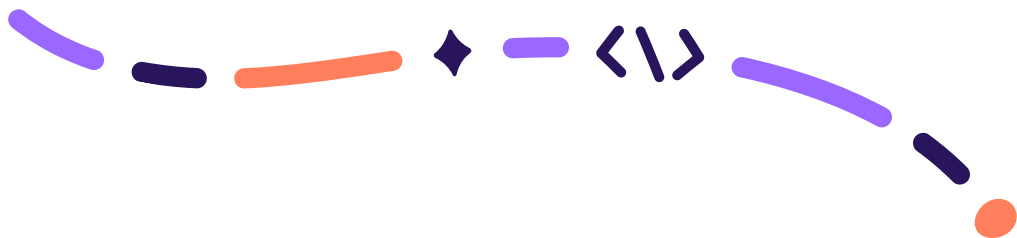

**Join us!**

Selected nonprofits embark on a 6-week AI strategy journey with specialized AI mentors to develop project ideas.

**AI Bootcamp**

Tech companies chose the AI projects they want to work on and build solutions with support from mentors, a vibrant community, and presenting at Demo Days.

**AI Sandbox**

## Jacek Siadkowski

CEO and Co-Founder  
Tech To The Rescue

“

*The power of AI is huge but with the high demand for AI talent, nonprofit changemakers are left forgotten. Social changemakers are crucial actors in solving modern challenges but they need the funds, skills, knowledge and cross-sector support to enable them. It is now our job to mobilize tech companies to join the accelerator and offer pro-bono tech support to nonprofits, in the spirit of Tech for Good.*

”

## Sounds great? Here are more benefits for your tech company!

### Partner with purpose

Collaborate with top global nonprofits and witness the transformative power of AI as you help them scale their impact.

### Be a Tech for Good leader

Develop secure and responsible AI solutions for disaster management, climate, health, education, and economic growth.

### Upskill and network

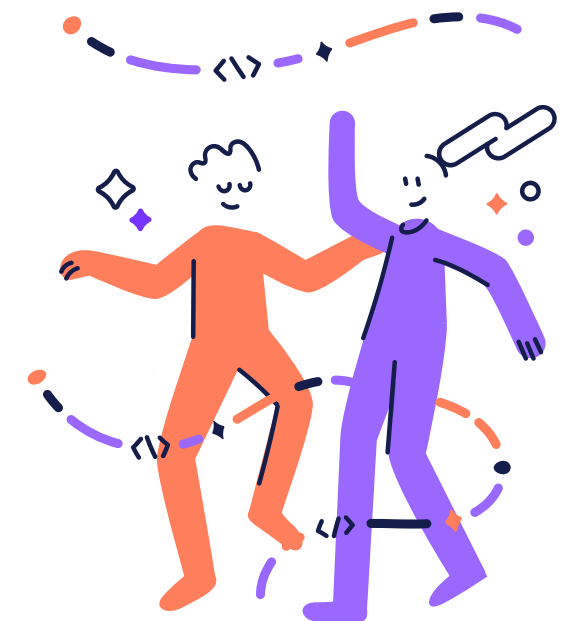

Join a vibrant community of like-minded tech companies, learn from experts, share knowledge, and forge new partnerships.

### Become a changemaker

Work on challenges that matter, build AI solutions that make a change, and inspire a movement in the tech industry.

### Build and pitch

Build your AI portfolio, present at Demo Days, participate in hackathons and attract potential donors.

**TECH TO THE RESCUE**

## Who we are

Tech To The Rescue is a global platform connecting technology companies with nonprofits around the world to solve the world's most pressing problems through technology.

## Our track record

Since 2020, more than 1500 technology companies and over 2000 nonprofits have joined our #techforgood movement, and our team has enabled more than 700 pro-bono technology projects.

## Our vision

A world in which every Changemaker with a proven intervention and high impact potential has access to the tech resources needed to implement solutions to scale up their impact.

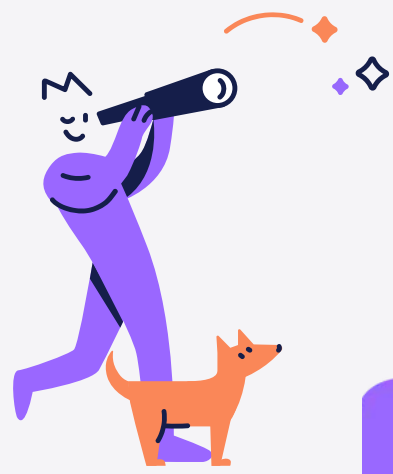

**We are proud of our global community of**

- 1500+ tech companies**
- 1400+ nonprofits**
- from 80+ countries**

Last year, we all saw generative AI become unexpectedly viable. There was also a clearer vision of how many human-driven services would be rapidly digitized. Tools for replacing customer service reps and copywriters have hit the market quickly, but many other roles like educators, coaches, and trainers are yet to be fully explored. We jumped in early last year to develop our prompt-engineering skills to explore the capabilities and limitations of these new powerful generative AI tools in digitizing various roles. Most NGOs have a mandate for public awareness and education. Plus, the use of technology has been key to these organizations scaling efficiently. We're very happy to be able to bring our experience to NGOs to allow them to use generative AI to scale and improve their educational efforts.

Andrew Gauvin  
CEO & Co-founder

# Success stories

At Tidio, we aim to make a positive impact and help people succeed. This is why we've partnered with Tech to Rescue. We get how crucial it is to equip NGOs with the right tools to create a better world, and we want to be the force that moves them forward. It's about empowering these organizations with the essential resources they need to thrive - offering free access to our products that help them create an efficient support experience for their beneficiaries. As they work tirelessly to improve the world, we strive to be the wind beneath their wings. Nothing motivates us more than knowing we've lightened someone's workload with Tidio - allowing them to focus on what truly matters - making a positive impact.

Tytus Gołas  
CEO and Co-founder

Since 2023, the Bacab Project has been at the forefront of monitoring and advocating for the human rights of indigenous communities in South America. Our mission was to create a freely accessible database cataloguing incidents affecting these communities, shedding light on their struggles and fostering a global dialogue towards change. The project's integration of AI has redefined the landscape of human rights monitoring for indigenous communities in South America. Automating time-consuming tasks has redirected our focus towards deeper analysis and more impactful advocacy. This revolution, brought about through our collaboration with TTR and Simplify Next, exemplifies the potential of AI to serve the greater good and reminds us of the power of technology to drive meaningful change.
